International Journal of Microwave and Millimeter-Wave Computer-Aided Engineering

Contents

VOLUME 3, 1993

Issue 1, January 1993

Special Issue:
Modeling of MESFETs and HEMTs for Microwave CAD

Editorial, 1–2
K. C. Gupta

Guest Editorial, 3–4
Christopher M. Snowden and Robert J. Trew

SPECIAL SECTION ARTICLES

An Analytical FET Model Including Overshoot and Surface Effects, 5–13
P. Nevermann and I. Wolff

HELENA: A Friendly Software for Calculating the DC, AC, and Noise Performance of HEMTs, 14–28
Henri Happy, Gilles Dambrine, Jocelyn Alamkan, François Danneville, François Kaptche-Tagne, and Alain Cappy

Modeling of Low-Noise Microwave HEMTs for CAD-Oriented Applications, 29–36
Alina Caddemi and Mario Sannino

Fast FET and HEMT Solvers for Microwave CAD, 37–60
P. H. Ladbrooke, A. J. Hill, and J. P. Bridge

REGULAR ARTICLES

Modeling of Nonlinear Elements in a Three-Dimensional Condensed Node TLM Mesh, 61–66
J. S. Nielsen and W. J. R. Hoefer

A Formula for the Resonance Frequencies of Circular Microstrip Patch Antennas Satisfying CAD Requirements, 67–70
Jibendu Sekhar Roy and Bernard Jecko

Nonsymmetry of Z-Matrices for Planar Circuits as Obtained by the Contour Integral Method, 71–75
C. M. Tsai and K. C. Gupta

MIC Simulation Column, 76–97
Coordinated by Inder J. Bahl

Book Review Column, 98–99
Coordinated by Ingo Wolff

Editorial Board 1993, 100–102

Erratum, 103

Call for Papers: Special Issue on CAD of Printed Antennas and Arrays, 104

Announcement: Special Issue on Microwave and Millimeter-Wave CAE in Japan, 105

Issue 2, April 1993

Editorial, 107–108
K. C. Gupta

Analysis of Open Microstrip Lines by MOL, 109–113
R. S. Chen, D. G. Fang, and X. G. Li

Diode Characterization in a Coaxial Mount, 114–117
Michael B. Steer

A Moment Method Formulation for Slot-Coupled Waveguide Tee-Junction, 118–125
Hanyang Wang and A. J. Sangster

Microwave Modeling of Curved Coplanar Waveguides, 126–133
M. S. Soghomonian and I. D. Robertson

A New Efficient CAD Technique for Inductive Reactance Coupled Waveguide Bandpass Filters, 134–142
Protap Pramanick and Prakash Bhartia

Design of a Log Periodic Strip Grating Microstrip Antenna, 143–150
Ronald R. DeLyser, David C. Chang, and Edward F. Kuester

LETTERS TO THE EDITOR

Some Comments on Electromagnetic De-Embedding and Microstrip Characteristic Impedance, 151–153
James C. Rautio

Response to Comments on De-Embedding by James C. Rautio, 154–155
Tapan K. Sarkar

MIC Simulation Column, 156–157
Coordinated by Inder J. Bahl

Book Review Column Announcement, 158

Editorial Board 1993, 159–160

Issue 3, July 1993

Special Issue:
Microwave and Millimeter-Wave Computer-Aided Engineering in Japan

Editorial, 161–162
K. C. Gupta

Guest Editorial, 163–164
Eikichi Yamashita and Masami Akaike

SPECIAL ISSUE ARTICLES

Unified Treatment of Scalar and Vector Potential Fields with Lorentz Gauge Condition by Spatial Network Expression (Invited Article), 165–174
Norinobu Yoshida

N-Way Sectorial Hybrid Power Divider Design Using Boundary Element Method (Invited Article), 175–182
Moriyasu Miyazaki, Osami Ishida, and Tsutomu Hashimoto

Analysis of Waveguide Directional Filters by the Moment Method (Invited Article), 183–1991
Hajime Seki

Analysis of Strip-Line Circuit Based on Planar Circuit Model and Planar Circuit Equations (Invited Review Article), 192–204
Jui-Pang Hsu

Rectangular Boundary Division Method and Its Applications (Invited Review Article), 205–220
Masayuki Nakajima and Eikichi Yamashita

A New Method for the Measurement and Analysis of Noise Parameters for MESFETs and HEMTs (Invited Article), 221–229
Masao Nishida, Hisanori Uda, and Yasoo Harada

Two-Dimensional Analysis of Cutoff Frequencies of GaAs MESFETs with Various Substrate Conditions (Invited Article), 230–237
Kazushige Horio

Computer-Aided Engineering for Microwave and Millimeter-Wave Circuits Using the FD-TD Technique of Field Simulations (Invited Article), 238–250
Tsugumichi Shibata and Hideaki Kimura

Cylindrical Gate Approach for Signal and Noise Modeling of Striped Channel Field-Effect Transistors (Invited Article), 251–261
Yuji Ando, Masaaki Kuzuhara, and Tomohiro Itoh

Maskless Device Fabrication Technology Using an Integrated Microwave CAD/CAM System (Invited Article), 262–270
Takashi Yamada, Kaoru Nogawa, Madoka Nishikawa, and Yasoo Harada

REGULAR ARTICLES

Finite Difference Modeling of Novel Waveguiding Structures for MMIC Applications, 271–286
Manook S. Soghomonian and Ian D. Robertson

Computation of Hybrid Modes in Waveguides Based on a Surface Integral Formulation, 287–294
Madhavan Swaminathan, Tapan K. Sarkar, and Peter Petre

MIC Simulation Column, 295–311
Coordinated by Inder J. Bahl

Editorial Board 1993, 312

Issue 4, October 1993

Special Issue:
CAD of Printed Antennas and Arrays—Part I

Editorial, 313–314
K. C. Gupta

Guest Editorial, 315–318
Peter S. Hall and David R. Jackson

SPECIAL ISSUE ARTICLES

TRANSMISSION LINE MODELS

The Transmission Line Models: Past, Present, and Future (Invited Review Article), 319–325
G. A. E. Vandenbosch, F. J. Demuynck, and A. R. Van de Capelle

A Network Model for the Aperture Coupled Microstrip Patch, 326–339
Mikael Dich, Allan Østergaard, and Ulrich Gothelf

CAD FORMULAS FOR PATCHES

CAD Formulas for Resonant Frequencies of TM_{01} and TM_{10} Modes of Rectangular Patch Antenna with Superstrate, 340–349
Wei Chen, Kai-Fong Lee, Jash S. Dahele, and Richard Q. Lee

A Simple and Accurate Model for the Resonant Frequency and the Input Impedance of Printed Antennas, 350–361
J. P. Damiano and A. Papiernik

PATCH FEED MODELING

CAD of Two-Port Gap-Coupled Rectangular Microstrip Patches and Linear Series-Fed Arrays, 362–377
Abdelaziz Benalla and K. C. Gupta

Computer-Aided Design of Probe-Fed and Aperture-Coupled Rectangular Microstrip Antennas, 378–385
Mohammad A. Saed

A CAD-Oriented Approach for Aperture-Coupled Patch Antennas, 386–396
S. Maci, L. Borselli, G. Avitabile, G. Biffi Gentili, and R. Tiberio

Modeling of Coaxial Feed Contribution to Microstrip Antenna Impedance: Comparison of a Numerical Model with Analytical Expressions, 397–404
J. M. Laheurte, A. Papiernik, and J. R. Mosig

PARASITIC ELEMENTS AND MULTILAYER CONFIGURATIONS

Computer-Aided Analysis of Microstrip Antennas Employing Parasitic Elements, 405–411
Lale Hayirlioğlu and M. Tuncay Birand

Moment Method Analysis of Circularly Polarized Microstrip Antenna with Parasitic Element, 412–419
T.-M. Au, K.-M. Luk, and K.-F. Lee

Mixed-Potential Integral Equation (MPIE) Formulation for Nonplanar Microstrip Structures of Arbitrary Shape in Multilayered Uniaxial Media (Invited Article), 420–431
Krzysztof A. Michalski

REGULAR ARTICLES

Time-Domain Analysis of Electromagnetic Coupling of Three-Dimensional Circuits Involving Through Holes, 432–441
Shuji Maeda, Tatsuya Kashiwa, and Ichiro Fukai

Three-Dimensional Finite Element Analysis of N-Port Waveguide Junctions Using Edge-Elements, 442–451
Man-Faï Wong, Odile Picon, and Victor Fouad Hanna

LETTERS TO THE EDITOR

Response to Comments on De-Embedding by James C. Rautio, 452–453
Achim Hill

Some Comments on Approximating Radiation, 454–457
James C. Rautio

Response to Comments on Approximating Radiation, 458
N. Dib, G. Ponchak, and L. Katehi

MIC Simulation Column, 459–470
Coordinated by Inder J. Bahl

Book Review Column, 471
Coordinated by Ingo Wolff

Index to Volume 3, 473–480
